SUMMARY

I bring a diverse professional background, having worked across research organizations, corporate environments, and educational institutions. My experience spans collaborative team settings, as well as hands-on involvement with startups, where I gained valuable insights into both field-related work and administrative logistics. With a passion for leveraging remote sensing and GIS technologies, I am eager to explore innovative applications through the adoption of cutting-edge techniques and the development of streamlined workflows.

EXPERIENCE

Training Associate

Spatial Thoughts LLP

10/2022 - Present Ahmedabad, India

<https://spatialthoughts.com/about/>

Learning platform for the modern geospatial technologies

- As a Training Associate, my role encompasses several key responsibilities. These include creating and testing training material for various courses, managing course logistics, providing technical support to participants, and contributing to consultancy projects. Additionally, I'm involved in research and development efforts aimed at creating new course material. Our course offerings span a variety of topics, including Google Earth Engine from basic to advanced levels, Spatial Analysis with Python, QGIS, and Command Line tools like GDAL.

Software Engineer

Genesys International Corporation Limited

10/2021 - 09/2022 Mumbai, India

<https://www.igenesys.com/>

Geospatial solutions company

- As a member of the development team, I was responsible for creating tools and scripts using Python within the QGIS software. These tools and scripts were designed to automate the workflow of spatial analysis and data processing.

Project Associate

National Environmental Engineering and Research Institute

02/2019 - 07/2021 Nagpur, India

[https://www.neeri.res.in/#googtrans\(en|en\)](https://www.neeri.res.in/#googtrans(en|en))

A Constituent laboratory of CSIR working towards providing innovative and effective solutions for environmentally sustainable development

- Managed and contributed to {2} significant projects, showcasing versatility and project coordination skills.
 - "RISK-PiNET: GIS-based Risk Assessment Modelling Tool for Water Distribution System"
 - "Environment Impact Assessment studies for IOCL Panipat refinery"

Other projects include LULC classification, Waterbodies identification and mapping, aquaculture pond extraction etc.

EDUCATION

M.Sc Geoinformatics

Bharati Vidyapeeth Institute of Environment Education and Research

📅 07/2016 - 08/2018

GPA

8.11 / 10

- **Dissertation: Early warning forest fire detection system using RS and GIS**

Abstract: Damage due to forest fire in India is remarkable and most of the forest fires are unreported. Study area "Gadchiroli" district of Maharashtra is backward village and manmade fires occur frequently in this area. Using MODIS satellite data which has 1 km spatial resolution, an algorithm was developed based on previous fire incidents and nature of the fire. Hotspots identified by this algorithm had been sent to forest authorities through e-mail to provide near real time alert with the location information of a fire incident.

- **Internship at National Centre for Polar and Ocean Research, Goa Project**

Topic : Remote sensing of Antarctica sea ice variability

Description: Using optical and microwave remote sensing, sea ice variability in 2017 was analyzed by processing time series data of Antarctic region. Various parameters which affects on sea ice melt and formation is analyzed using modeled data to identify the trend and anomaly. For time series data analysis automation of satellite image processing was done using python, GDAL and CDO.

B.Sc Mathematics (Hons.)

Faculty of Science, The Maharaja Sayajirao University of Baroda

📅 07/2013 - 06/2016

GPA

5.65 / 10

SKILLS

Remote Sensing and GIS tools/softwares

Google Earth Engine API

QGIS

PostGIS/PostgreSQL

GDAL

CDO

Programming Skills

Python

R

Operating Systems

Windows

Ubuntu

macOS
